

1	Briefly outline Piaget's theory of language	
2	What do we need to develop according to this theory?	
3	What stages do we need to pass through according to this theory? (Name all four)	
4	How is the theory Language depends on thought supported?	
5	What is lacking from the theory Language depends on thought and why?	
6	Briefly outline the Sapir-Whorf hypothesis	
7	What is Linguistic determinism?	
8	What are the hard and soft versions?	
9	What is linguistic relativism	
10	Give an example of possible linguistic relativism	
11	What group was researched by Whorf and what was special about them?	
12	Why is Whorf's work criticised?	
13	Describe research that supports the Sapir-Whorf hypothesis in relation to events.	
14	What native group were researched for their colour vision and why?	
15	Describe research that supports the Sapir-Whorf hypothesis in relation to colour.	
16	What suggests all people have the same perception of colour?	
17	What practical application does the Sapir-Whorf hypothesis have?	
18	What is thought to be a main difference between animal and human communication?	
19	How do animals communicate survival?	
20	How do animals communicate reproduction?	
21	How do animals communicate territory?	
22	How do animals communicate food?	
23	What two properties are present in human but not animal communication	
24	Who was Von Frisch?	
25	Briefly describe the method in Von Frisch's study	

26	Briefly describe the results of Von Frisch's study	
27	Why may Von Frisch's study lack validity?	
28	What factors of communication does Von Frisch's study ignore?	
29	Define verbal communication	
30	Define non-verbal communication	
31	Outline one function of eye contact (any order)	
32	Outline a second function of eye contact (any order)	
33	Outline a third function of eye contact (any order)	
34	Define open and closed postures.	
35	Define postural echo	
36	Define touch applied to body language.	
37	Outline culture applied to personal space.	
38	Outline status applied to personal space.	
39	Outline gender differences applied to personal space.	
40	Positively evaluate research into body language.	
41	Critically evaluate research into body language.	
42	Outline the argument body language is innate.	
43	What evidence is there that body language is innate.	
44	What does it mean to say body language is learnt.	
45	What was the method of Yuki's study?	
46	What were the results of Yuki's study?	
47	Why may Yuki's study lack validity?	
48	Why was Yuki's study limited?	
49	Why would body language be evolved?	
50	What does it mean to say body language is adaptive?
